LIST OF CONTENTS

Number 1

D. E. Cox, A. C. Damask and **G. J. Dienes**	1	Editorial
		Perspectives
F. J. Himpsel	3	Inverse photoemission
		Research Papers
Victor M. Ratag	9	The effect of bond-angle and dihedral-angle disorders on the top of the valence band of amorphous silicon
S. R. Dhanalakshmi, T. Nagarajan, S. Ramasamy, S. Srinivasan and **J. A. Sekhar**	15	Positron annihilation and Mössbauer effect studies in rapidly solidified aluminium based iron misch metal alloys
Peter S. Belton, Robin K. Harris and **Philip J. Wilkes**	21	Solid-state phosphorus-31 NMR studies of synthetic inorganic calcium phosphates
Z. Starý, J. Horák, M. Stordeur and **M. Stölzer**	29	Antisite defects in $Sb_{2-x}Bi_xTe_3$ mixed crystals
Masaki Maeda and **Takuro Ikeda**	35	The glass transition and crystallization of amorphous $[xLi_2O\cdot(1-x)Na_2O]$–$2B_2O_3$
S. Fujita	41	Statistical mechanical theory of fast interstitial diffusion in metals
D. E. Cox, A. R. Moodenbaugh, J. J. Hurst and **R. H. Jones**	47	A neutron powder diffraction study of $Ba_2YCu_3O_7$
A. N. Cormack, G. V. Lewis, S. C. Parker and **C. R. A. Catlow**	53	On the cation distribution of spinels
W. Lengauer	59	Interdependency of composition and T_c of δ-VN_{1-x} and the influence and determination of its nitrogen surface diffusion layers
S. M. Kim	65	Vacancy properties in ordered CoGa and FeAl
H. Eckert, C. J. Chen, M. Greenblatt and **R. H. Herber**	71	Electron hopping in lithiated spinels: a temperature dependent Mössbauer study
R. D. Singh, N. V. Unnikrishnan and **M. Matera**	79	Pulsed laser induced photoconductivity in ZnS—Part I
Takasuke Matsuo, Hai-Ke Yan and **Hiroshi Suga**	85	Calorimetric study of the phase transition in deuterated methylammonium hexachlorostannate
D. Prakash and **J. C. Upadhyaya**	91	Many-body forces in the lattice dynamics of some fcc transition metals
D. C. Look and **J. W. Farmer**	97	The type-conversion phenomenon in electron-irradiated GaAs
David Cahen	103	Atomic radii in ternary adamantines
		Technical Notes
A. L. Dawar, C. Jagadish, P. K. Shishodia, Sanjay Sharma, S. K. Kapoor, B. K. Sachar and **P. C. Mathur**	113	Effect of hydrogen on the electrical properties of *p*-type $Pb_{0.8}Sn_{0.2}Te$ thin films
J. K. Srivastava	115	Transverse freezing in powdered Fe_2TiO_5

Number 2

M. S. Islam and C. R. A. Catlow 119 Structural and electronic properties of $NiMn_2O_4$

P. K. Chakraborty, J. C. Biswas and C. L. Roy 125 A study of interband tunneling in a semiconductor in the presence of a magnetic field

S. V. J. Lakshman and A. Suresh Kumar 133 Optical absorption spectra of Pr(III), Nd(III), Er(III) and Tm(III) ions in potassium sodium phosphate glass

C. M. Pelletier, S. Roland, R. Cranger and A. Lasbley 139 Acoustical deformation potential and effective mass in *n*-type lead telluride between 4 and 300 K

D. A. MacInnes and P. W. Winter 143 The effect of the chemically inert fission products on the chemistry of irradiated UO_2

Keu Hong Kim, Do Young Yim, Sung Ho Park and Jae Shi Choi 151 Electrical conductivity of the system $X\,ZrO_2 + (1 - X)\,Er_2O_3$; $0.05 \leqslant X \leqslant 0.15$

W. Meisel, J. Mintjens and W. P. Bosman 157 Hyperfine interactions in an oxonium ferric orthophosphate

Manvir S. Kushwaha 165 Collective excitations in periodic semiconductor multiheterostructures

H. A. Lauwers 173 The evaluation of the Scott effective charge in binary and chalcopyrite compounds

Michael F. Reid 185 On the use of $\mathbf{E}\cdot\mathbf{r}$ and $\mathbf{A}\cdot\mathbf{p}$ in perturbation calculations of transition intensities for paramagnetic ions in solids

J. Horák, Z. Starý, P. Lošťák and J. Pancíř 191 Antisite defects in $Sb_{2-x}In_xTe_3$ mixed crystals

W. Ryba-Romanowski, B. Jeżowska-Trzebiatowska, W. Piekarczyk and M. Berkowski 199 Optical properties and lasing of $BaLaGa_3O_7$ single crystals doped with neodymium

E. Iguchi, T. Yamamoto and R. J. D. Tilley 205 Bipolaron effects on the lattice energy of Ti_4O_7

P. A. Algarabel, A. del Moral, M. R. Ibarra and J. I. Arnaudas 213 Spin reorientation in $RECo_5$ compounds: a.c. susceptibility and thermal expansion

M. L. Dalal, S. Sivaraman and Y. V. G. S. Murti 223 Space charge limited current (SCLC) in alkali halide crystals during electrolytic coloration

Technical Note

King-Sun David Wu and D. E. Beck 233 The optical calculation of the surface plasma modes for metal spheres and voids in metals

Number 3

Perspectives

B. A. Joyce 237 Molecular beam epitaxy: recent trends and future developments

Research Papers

S. T. Weidman and R. A. Johnson 243 Corrections for correlation during homogeneous void nucleation

Han-Ill Yoo and **B. J. Wuensch** 253 Irreversible thermodynamic analyses of nonisothermal isotopic interdiffusion in ionic solids

El-Zeiny M. Ebeid and **Ahmed M. Donia** 263 Structural and photochemical transformations in anthracenes

G. Kliche and **W. Bauhofer** 267 Far-infrared reflection spectra and electrical properties of the skutterudite $CoAs_3$

J. I. Peña, P. J. Alonso and **R. Alcalá** 273 Radiation effects in hydrolysed CaF_2, SrF_2 and BaF_2

A. R. Chetal, P. Mahto and **P. R. Sarode** 279 Chemical-shift of the X-ray K-absorption edge of Co in some compounds, complexes and minerals

S. F. Matar, J. M. Reau, P. Laborde and **A. Rhandour** 285 Static modelling of the fast ion conductors β-$KBiF_4$ and γ-$RbBiF_4$

Jiang-Tsu Yu, Shen-Yuan Chou and **Shu-Jeu Huang** 289 Low-temperature phase transitions of $LiCsSO_4$: ESR of $\dot{N}H_3^+$ and Cr^{5+}

F. Taulelle, C. Sanchez, J. Livage, A. Lachgar and **Y. Piffard** 299 High resolution solid state ^{31}P NMR in some antimony-phosphates

Victor A. Maroni 307 Valence force field treatment of the rutile structure at zero-wave vector

Colin L. Honeybourne and **Callum A. S. Hill** 315 The chemical degradation of gas-sensing meso-tetra-arylporphin thin films by high levels of dinitrogen tetroxide

Technical Note

S. C. Deevi 323 Importance of local heating in the compaction of thermally sensitive solids

Announcement

327 Analytical Techniques in Monitoring the Environment

Number 4

Yu. V. Golikov and **V. F. Balakirev** 329 Phase equilibrium diagram of the system—Ni–Mn–O

V. Ya. Sukharev, V. V. Chistyakov and **I. A. Myasnikov** 333 Percolation electroconductivity of two-component barrier-disordered polycrystalline composites

He Xiao-Peng and **Du Mao-Lu** 339 Theoretical studies on the EPR of $K_3Co(CN)_6:Cr^{3+}$

R. Gérardin, E. Millon, A. Bonazebi, J. F. Brice, F. Jeannot et **O. Evrard** 343 Structures et propriétés magnétiques des ferrites de calcium pseudo hexagonaux $Ca_4Fe_9O_{17}$, $CaFe_4O_7$ et $Ca_3Fe_{13}O_{25}$

J. Mašek and **J. Kudrnovský** 349 Electron states in random substitutional alloys: the self-energy

D. E. Tsatis 359 Thermal expansion of pyrrhotite (Fe_7S_8) at high temperatures

L. De Luca, U. Giorgianni, P. Perillo and **G. Saitta** 363 Spectroscopic studies of complex ion centres in thallium bromide solutions

H. Boussetta and **C. Monty** 369 Magnesium impurity diffusion in $Co_{1-x}O$ single crystals

J. M. Dance, A. Wichainchai, P. Dordor, E. Marquestaut, J. P. Doumerc and **A. Ammar** 377 Determination of the zero field splitting and exchange narrowing of FPR linewidth in Cr^{3+} delafossite-type oxides

M. Benzakour, R. Tetot and **G. Boureau** 381 Statistical thermodynamics of cerium dioxide

J. A. Alonso and I. Rasines 385 On the influence of the non-bonded pair of Pb(II) in the novel ordered perovskite $Pb[Sc_{0.50}(Ti_{0.25}Te_{0.25})]O_3$

C. Rincón 391 On the deformation potentials in $CuInSe_2$ ternary semiconductors

A. K. Wong, J. G. Sparrow and S. A. Dunn 395 On the revised theory of the thermoelastic effect

M. Yoshihara and R. B. McLellan 401 Thermodynamic study of the palladium–yttrium–hydrogen system

V. Leute and H. M. Schmidtke 409 Thermodynamics and kinetics of the quasibinary system $Hg_{(3-3k)}In_{2k}Te_3$—I. Investigations by X-ray diffraction and differential thermoanalysis

Hongxing He and T. R. Welberry 421 Calculation of elastic constants for crystalline acenaphthylene, $C_{12}H_8$, using semi-empirical atom–atom potentials

O. Yamamuro, M. Oguni, T. Matsuo and H. Suga 425 Calorimetric study of pure and KOH-doped tetrahydrofuran clathrate hydrate

J. C. Gachon 435 A comparison between computed and measured enthalpies of formation of binary transition alloys. Accuracy and relativity of model predictions

P. Jacobsson and B. Sundqvist 441 Pressure dependence of the thermal and electrical conductivities of the intermetallic compounds AuCu and $AuCu_3$

C. Michel, L. Er-Rakho and B. Raveau 451 $La_{8-x}Sr_xCu_8O_{20-\epsilon}$: a metallic conductor belonging to the family of the oxygen-deficient perovskites

H. Murakami, I. Kanazawa, M. Sano, T. Enoki and H. Inokuchi 457 Hydrogen in a graphite–rubidium intercalation compound RbC_8 studied by positron annihilation

Number 5

H. Brooks, G. J. Dienes, A. C. Damask and D. E. Cox 461 Robert Maxwell and the founding of the *Journal of Physics and Chemistry of Solids* in 1955

Research Papers

A. L. Ivanovsky, V. I. Anisimov, D. L. Novikov, A. I. Lichtenstein and V. A. Gubanov 465 The influence of structural defects on the electronic properties of interstitial alloys—I. Lattice vacancies

A. L. Ivanovsky, V. I. Anisimov, A. I. Lichtenstein and V. A. Gubanov 479 The influence of structural defects on the electronic properties of interstitial alloys—II. Metal substitutional impurities

A. L. Ivanovsky, D. L. Novikov, V. I. Anisimov and V. A. Gubanov 487 The influence of structural defects on the electronic properties of interstitial alloys—III. Non-metal substitutional impurities

Du Yinglei, Wu Baimei and He Pingsheng 499 Photoacoustic study of PTS (bis-*p*-toluene sulfonate of 2,4-hexadiyne-1,6-diol) single crystal and its thermal properties

R. Rodríguez-Mijangos and C. Ruiz Mejía 505 F band shift in mixed alkali halide crystals

P. Arendt 511 The xerogel made from decomposing liquid metal–ammonia solutions—a solid material which carries current densities of 10^5 A cm^{-2} at room temperature

Jun Qing Lu, Guo Xiang Lan, Bing Li, Yan Yong Yang, Hua Fu Wang and Bai Chang Wu 519 Raman scattering study of the single crystal β-BaB_2O_4 under high pressure

A. Sato, Y. Watanabe and **T. Mura**	529	Octahedral defects in a b.c.c. lattice examined by lattice theory
N. Hitmi, C. LaCabanne and **R. A. Young**	541	OH^- reorientability in hydroxyapatites: effect of F^- and Cl^-
E. H. P. Cordfunke and **D. J. W. IJdo**	551	$Ba_2U_2O_7$: crystal structure and phase relationships
H. C. Kandpal and **K. C. Joshi**	555	Temperature-dependent energy transfer from $^5D_3$ and $^5D_4$ states of Tb^{3+} to Sm^{3+}
S. Fujita and **J. Neugebauer**	561	General theory of interstitial diffusion in crystals
Jagannadham Akella, Gordon S. Smith and **Andrew P. Jephcoat**	573	High-pressure phase transformation studies in gadolinium to 106 GPa
A. Halperin and **S. Katz**	577	Irradiation effects on the low-temperature thermoluminescence (TSL) of quartz crystals
		Technical Notes
S. A. Akbar	585	Hopping conduction in Na-β-alumina: temperature dependence
P. K. Basu and **Raymond D. Mountain**	587	Molecular dynamics evaluation of cell models for type I gas hydrate crystal dynamics

Number 6

D. J. Morgan	v	Preface
A. R. Beattie	vii	Peter T. Landsberg
1. *Recombination in Semiconductors*		
A. R. Beattie	589	A lifetime in Auger transitions
A. Haug	599	Band-to-band Auger recombination in semiconductors
R. A. Abram, R. W. Kelsall and **R. I. Taylor**	607	Auger recombination in low-dimensional structures
H. G. Grimmeiss and **M. Kleverman**	615	Local Auger effects at point defects in silicon
J. S. Blakemore	627	Electron capture and emission for midgap centers
G. Blanc	633	Test of a distribution for electron trap lifetimes in ZnS which is related to the maximum entropy principle
2. *Transport Theory and Nonlinear Behaviour*		
C. M. Van Vliet and **P. Vasilopoulos**	639	The quantum Boltzmann equation and some applications to transport phenomena
E. Schöll	651	Nonequilibrium phase transitions and chaos in semiconductors
K. A. Shore	659	Non-linearities in laser diodes
J. Singh	667	Excitation transfer in crystalline solids
N. G. van Kampen	673	Diffusion in inhomogeneous media
3. *Statistical Thermodynamics*		
F. Schlögl	679	Thermodynamic uncertainty relation

B. H. Lavenda	685	On the phenomenological basis of statistical thermodynamics
J. Wagensberg, D. López and J. Valls	695	Statistical aspects of biological organization
G. L. Sewell	701	Gravitational thermodynamics and the generalized second law
J. Dunning-Davies	705	Thermodynamics of non-extensive systems
4. *Thermodynamics and Energy Conversion*		
W. Muschik	709	Formulations of the second law—recent developments
P. Würfel	721	Generation of entropy by the emission of light
A. De Vos	725	Thermodynamics of radiation energy conversion in one and in three physical dimensions

Number 7

M. R. Burd and R. Braunstein	731	Deep levels in semi-insulating liquid encapsulated Czochralski-grown GaAs
Z. A. Matysina, M. I. Milyan and S. Yu. Zaginaichenko	737	The solubility of interstitial impurities
A. M. George and A. N. Virkar	743	Mixed iono-electronic conduction in β-$LaNb_3O_9$
E. N. Maslen and M. G. Trefry	753	3*d* transition metals: electron promotion and the independent atom model
Han-Ill Yoo and Harry L. Tuller	761	Analytic calculation of cation distributions in ferrite spinel $Mn_{1-\gamma}Fe_{2+\gamma}O_4$
H. Haeuseler, W. Kwarteng-Acheampong and M. Jung	767	Crystal structure and electrical conductivity of $Ga_{1.78}Cr_{0.89}S_4$
A. Erçelebi and U. Özdinçer	769	Impurity-bound electron in quantum well-heterostructure-type systems
S. S. Goldenberg, M. D. Kellam and L. M. Slifkin	773	Luminescent recombination processes of the self-trapped hole in copper-doped silver chloride
A. El Jazouli, A. Nadiri, J. M. Dance, C. Delmas and G. Le Flem	779	Relationships between structure and magnetic properties of titanium(III) Nasicon-type phosphates
E. Mörsen, B. D. Mosel, W. Müller-Warmuth, M. Reehuis and W. Jeitschko	785	Mössbauer and magnetic susceptibility investigations of strontium, lanthanum and europium transition metal phosphides with $ThCr_2Si_2$ type structure
V. Vorlíček, I. Gregora, V. Riede and H. Neumann	797	Raman scattering study of GaP:N epitaxial layers
S. V. J. Lakshman and A. Suresh Kumar	807	Lifetimes of laser lines of Pr^{3+}, Nd^{3+}, Er^{3+} and Tm^{3+} ions in acetophosphate glass
J. G. Kang, S. K. Ju, Y. H. Gill, I. K. Shim and C. K. Chang	813	Emission and excitation spectra from divalent Ge ions in KCl single crystals
P. Gerdanian	819	A new $\Delta H(O_2)$ determination method by high-temperature microcalorimetry study of oxide–oxido-reducing gaseous mixtures reaction. Application to wüstite

J. Sjöström 827 Magnetic instability and crystalline field anisotropy in the space group $P\bar{6}2m$ with application to Fe_2P

Chul Hyun Yo, Cheol Woo Kim, Eun Seok Lee, Woong Bum Pyon and Jae Shi Choi 835 A study of the nonstoichiometry and electrical conductivity of gadolinium sesquioxide

V. P. Zhukov, V. A. Gubanov, O. Jepsen, N. E. Christensen and O. K. Andersen 841 Calculated energy-band structures and chemical bonding in titanium and vanadium carbides, nitrides and oxides

Zhou Yi-Yang 851 Spectra of gillespite, $BaFeSi_4O_{10}$, at high pressure

Technical Note

A. B. Vassilikou-Dova 855 Dipole aggregation in LiF doped with Be^{2+}

Number 8

Perspectives

J. D. Birchall 859 High strength ceramics: problems and possibilities

C. A. Angell 863 Perspective on the glass transition

Research Papers

H. T. Hintzen and H. M. van Noort 873 Investigation of luminescent Eu-doped sesquioxides Ln_2O_3 (Ln = In, Sc, Y, La, Gd, Lu) and some mixed oxides by ^{151}Eu Mössbauer spectroscopy

C. K. Ong and G. S. Khoo 883 Determination of CNDO parameters for germanium and their application to simple germanium molecules

G. Yaron, Y. Goldstein, A. Many, S. Z. Weisz and O. Resto 887 Persistent photoenhancement of hydrogen-implanted quantized accumulation layers on ZnO surfaces

Y. Sakamoto, O. Shimizu, K. Hirayama and K. Baba 897 The diffusivity of hydrogen in nickel-based solid solutions

Roger Frech and Enzo Cazzanelli 905 The reconstructive nature of the cubic-to-monoclinic phase transition in lithium sulfate

M. Devillers, J. Ladrière and D. Apers 909 ^{57}Fe emission Mössbauer study of matrix influence on the electron capture after-effects in ^{57}Co-doped dihydrated oxalates of some bivalent metals

M. Devillers, J. Ladrière and D. Apers 921 Emission Mössbauer study of ^{57}Fe in ^{57}Ni-labelled nickel(II) oxalate dihydrate

M. Mylrajan and T. K. K. Srinivasan 929 Raman and infrared studies of structural phase transition in $(CH_3)_2NH_2NO_3$

R. M. Ayral-Marin, B. Liautard, M. Maurin, J. C. Tedenac et G. Brun 939 AgTlTe—étude de la zone de solution solide et de ses modifications structurales

Mark E. Cavaleri, Thomas G. Plymate and James H. Stout 945 A pressure–volume–temperature equation of state for Sn(β) by energy dispersive X-ray diffraction in a heated diamond-anvil cell

B. I. Craig and P. V. Smith 957 A semi-empirical approach to the electronic structure of copper surfaces

J. G. Grammatikakis, K. Eftaxias, S. Patapis and V. Hadjicontis 965 A simple model applied to the elastic properties of the lead–thallium and magnesium–lithium alloys

H. Chacham, J. L. A. Alves, M. L. De Siqueira and José R. Leite — 969 Electronic structure of cationic core excitons in II–VI semiconductors

C. K. Jayasankar, F. S. Richardson, P. Porcher and J. Ostorero — 975 Spin-correlated crystal-field analysis and temperature-dependent paramagnetic susceptibility of neodymium gallium garnet

Ali Tatli — 981 Elastic constants of uvite: temperature dependence

Motohiro Nakano, Tomio Wakamatsu, Michio Sorai and Hiroshi Suga — 987 Cluster pairing in the paramagnetic trinuclear complex compound $[Cr_3O(CH_3COO)_6(H_2O)_3]Cl \cdot 6H_2O$: calorimetric study at very low temperatures

A. K. Koh — 993 Isotropic hyperfine coupling constant in manganese-doped $Cd_{1-x}Zn_xSe$

N. Nafari and M. P. Das — 997 A model for bimetallic interfaces—II

Number 9

Colin L. Honeybourne, Callum A. S. Hill, Richard J. Ewen, M. S. Collings and William C. Clarke — 1003 Substituent and metal-ion complexation effects upon the gas-surface interactions of thin organic films

K. Chakrabarti — 1009 Photobleaching and photoluminescence in neutron-irradiated YAG

L. C. Balbás, A. Rubio, J. A. Alonso, N. H. March and G. Borstel — 1013 X-ray scattering factors of crystalline silicon and germanium from a bond charge model

Keu Hong Kim, Sung Ho Park, Jae Shi Choi and Kyung Woo Hyung — 1019 Electrical conductivity of the solid solution $Th_xGd_{2-2x}O_{3-x}$

Kyung Moon Choi, Keu Hong Kim and Jae Shi Choi — 1027 Electrical conductivity of the system ThO_2–Er_2O_3

S. K. Pabi and H. Hahn — 1035 A highly sensitive method for measurement of ^{222}Rn permeability in metals

A. Shluger, S. Mysovsky and A. Nepomnyaschikh — 1043 Formation of self-trapped holes under optical excitation of impurity centres in LiF crystals

Kiyofumi Hirokawa and Yoshihiro Furukawa — 1047 Phase transitions and ionic motions in ammonium potassium hexafluoroaluminates(III) with compositions of $(NH_4)_{3-x}K_x[AlF_6]$ ($x = 1,2$) as studied by ^1H, ^{19}F, and ^{27}Al nuclear magnetic resonance

P. P. Lottici, G. Antonioli and C. Razzetti — 1057 Bond strengths in defect chalcopyrite $ZnGa_2Se_4$ by temperature dependence of EXAFS

H. Verweij and W. H. M. Bruggink — 1063 Precision determination of the stoichiometry parameter x of $YBa_2Cu_3O_x$

S. Mancour et P. Caillet — 1071 Modes de vibration et liaisons chimiques dans des composés $M^{II}Mo_6X_{14}$

K. Chhor, L. Abello, C. Pommier and C. Sourisseau — 1079 Reorientational motions in a perovskite-type layer compound $[NH_3(CH_2)_5NH_3]MnCl_4$. A calorimetric study

A. Zięba, H. Fjellvåg and A. Kjekshus — 1087 Magnetic phase diagrams and properties of transition metal substituted MnP
